The idea:
Stop lup music books or folders to the show.
All notes in the computer, and when calling up and displaying a sheet music file it is also best to automatically set the organ correctly to the title.

ATMObyte Böhm classic-Editionis a complex software, with an unlimited number of titles and the associated notes or texts in PDF format.
The titles can be distributed to any number of playlists. Titles can be assigned to 12 different set's and the desired set can be activated with one click.

For each title, a sound file in mp3 format can be deposited and played as required.
For each title, a video file (mp4) can be stored and played on a second monitor or projector as needed.

With the scanning function integrated in ***ATMObyte Böhm classic-Edition***, existing paper notes can be scanned directly.
The correct assignment and saving in PDF format are automatic.
Of course, already existing PDF files can be used.
Calling a title not only displays the corresponding notes,
but the title-related registration of the connected **organ** is called automatically.

The software runs under all Windows systems.
Mac systems require the installation of VMware Fusion beforehand.
If a tablet computer is used, the software automatically adapts to the position of the tablet.
When used vertically (portrait), the display automatically switches to 1-sided display,
so that the sheet of music is displayed on the entire display.
ATMObyte GENOS-Edition but only start when the desired position of the display is done.

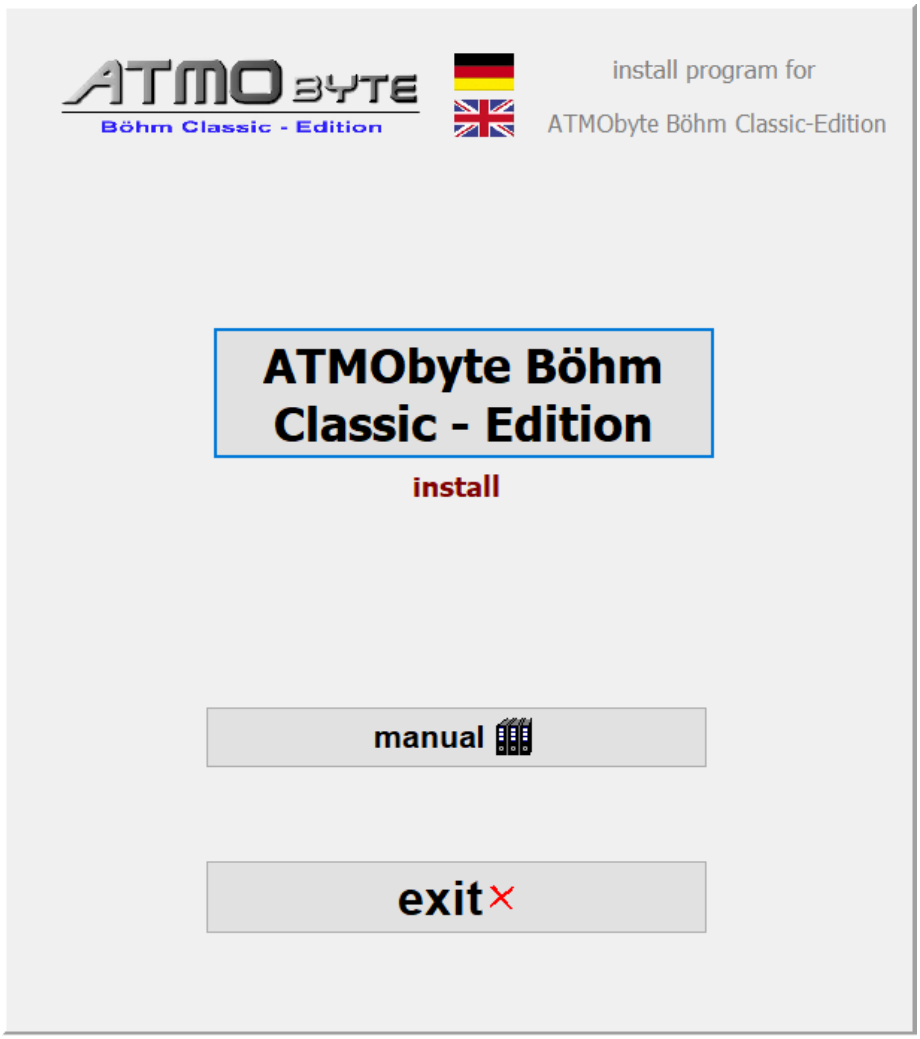
1.1 Installation from CD

After inserting the CD into the computer, the installation program starts automatically.
If this does not happen please start the file *InstallBCE.exe* on the CD with a double-click.

1.2 Installation of the download version

In the download version, the program is automatically installed.

The following menu options are now available:



The ***ATMObyte Böhm classic-Edition*** installation routine installs the program on your computer.
The installation directory can be chosen freely and is preset to **C: **.

Installation is not possible in the directories **C: \ Programs** and **C: \ Programs (x86)**.
These directories are systemically important. An installation would only require a change in the registry be possible and that should be avoided.

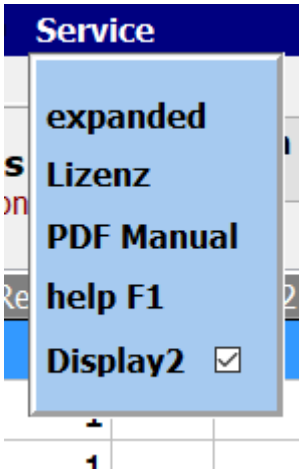
Only the folder ***ATMObyte Böhm classic-Edition*** with all
files belonging to the program will be copied to the hard disk
and no changes are made to the system or the REGISTRY.

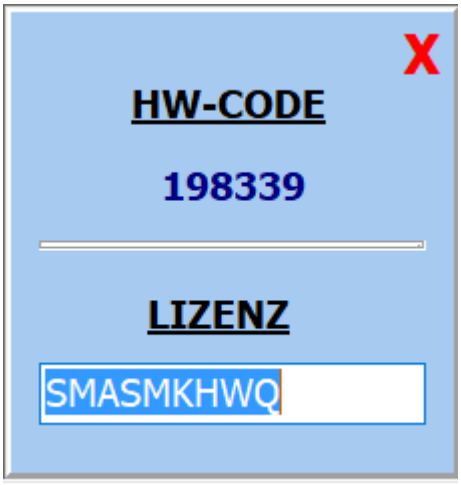
During the installation this message can come from **Windows Defender**,

but that has to do with Microsoft and their caution and
not with problems or dangers of the software itself.
Of course, Windows knows neither the program nor the manufacturer, so security is important first.
You also get this message when installing many other programs.
The installation is carried out by clicking on **More information** and then on **Install anyway**.

When first started, the software starts as a DEMO version.
To license the software, from the DEMO version to make a full version, the entry of a license code is necessary.

The entry is made in the menu item SERVICE under license.





For the creation of the license code the serial number is always necessary.

First steps

After the software is installed, it can be started.

At the first call the software starts as DEMO version.
In the DEMO version the software can be extensively tested.

The only limitations are that the notes are overwritten with **DEMO**.

All functions can be used without restrictions.

If a license code is available, the software can be registered with this code and is a full version.

If you want to call up the registration of the keyboard for the title you are calling,
so the keyboard must first be set once to the correct MIDI channel.

This channel is specified by **ATMObyte *Böhm classic*-Edition** and can be changed under Service-> Settings.
When installing **ATMObyte *Böhm classic*-Edition** for the first time, this is channel 16.

Organ settings

To use the registration call of the connected organ
just change the MIDI setting of the organ as follows:

If the MIDI channel 16 is used, the following settings apply to the organ:
MIDI IN Channel 16

DEMO version

At the first call the software starts as DEMO version.
In the DEMO version the software can be extensively tested.

The only limitations are that the notes are overwritten with **DEMO**.

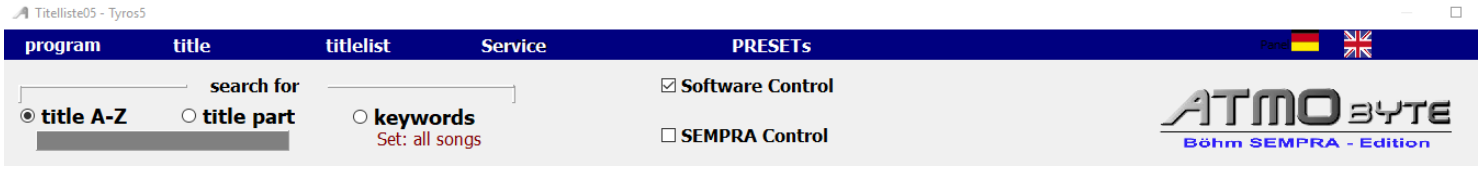
All functions, can be used without restrictions.

FULL version

In the full version, ie after entering a correct license code,
all functions listed in the description are executable.
The coverage of the notes with **DEMO** in the DEMO version is no longer visible.

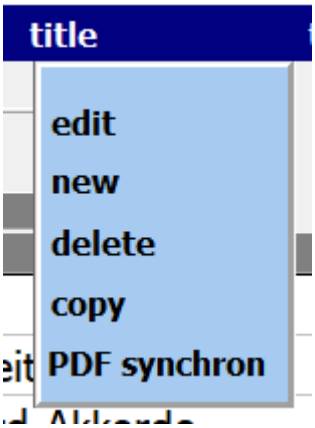
menu bar

The individual functions of ***ATMObyte Böhm classic-Edition*** can be called up via the buttons in the menu bar.



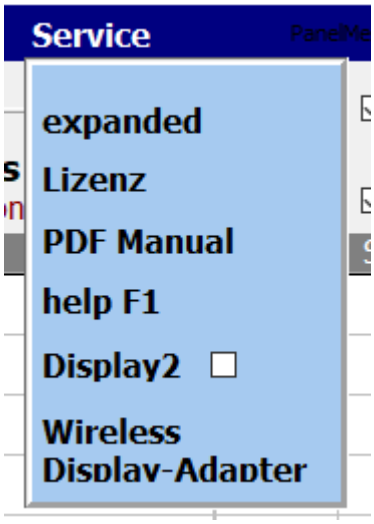
With ***program*** the ***ATMObyte Böhm classic-Edition*** can be stopped

---



With ***title*** a title can be used to create a title
a title will be deleted
a title will be copied
a title will be rename

With ***Titlelist*** a new titlelist can be create
a titlellist will be deleted
a titlellsit will be renam



With **Service** you switch to the settings area of the program
and important program properties can be changed.

With **extended** you get to the global settings for the program.

Under **LICENSE** the LICENSE will be activated as a full version.

With PDF Manual the program documentation can be printed out as PDF.

The internal program description is called up via **Help F1**.
This call can be made at any point in the program at any time.

If **Display 2** is activated, the notes from the subdirectory PDF \ Display2 are displayed.
Standard is PDF \ Display1.

With the wireless display adapter, the PC is wirelessly connected to a monitor or projector.

If the switch ☑ **Software Control** is deactivated, the registration will be made for a title call the organ does not change. Only the notes are displayed. This allows playing a variety of titles with the same registration of the organ.

With ***PRESETs*** the 20 available PRESETs are called.
These can be edited and / or played.

Keyboard on / off displays or hides an on-screen keyboard.

With the ***country flags*** the language of the program can be changed.

Title

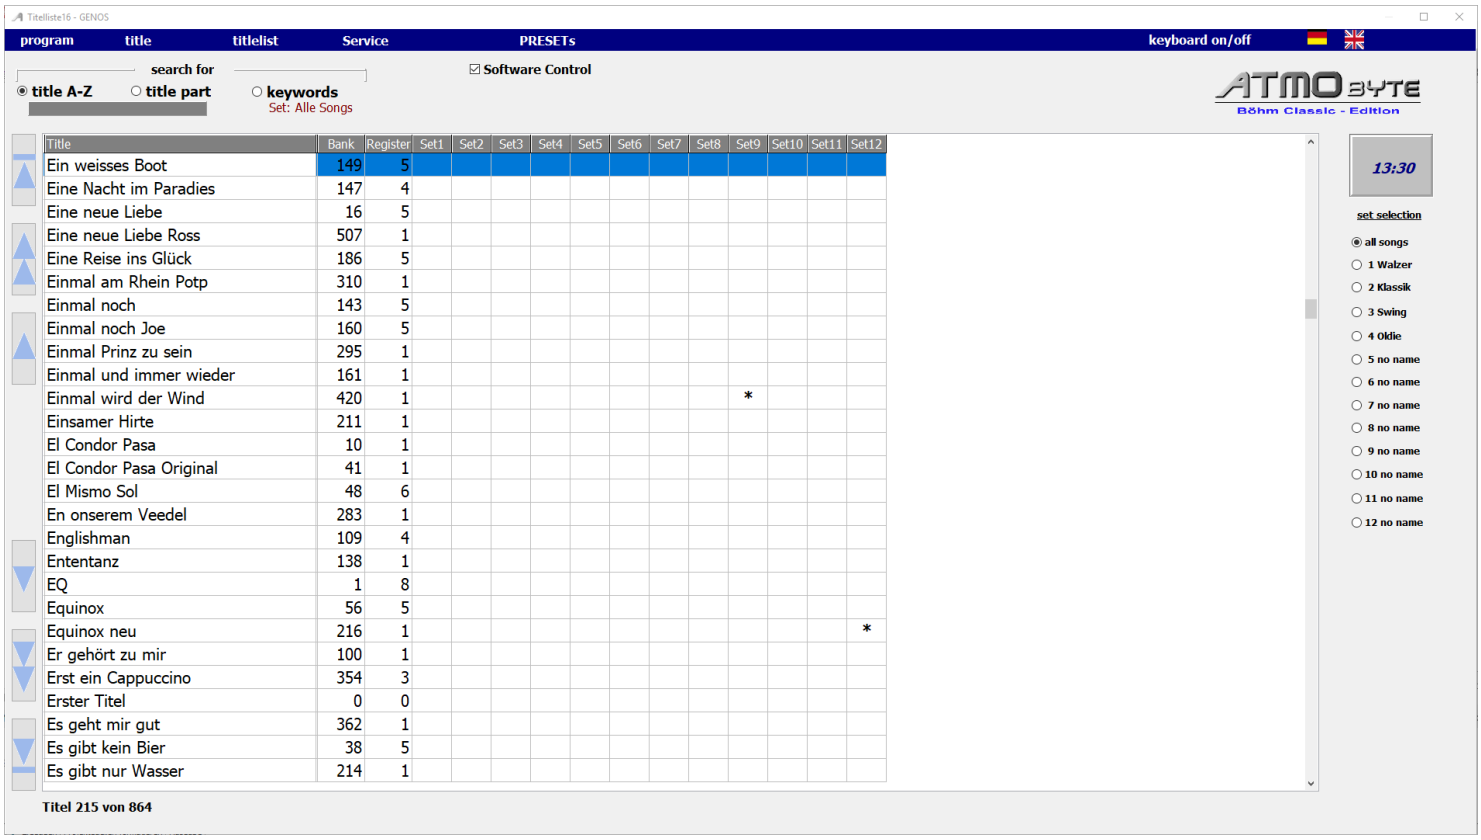
A title is an entry in one of any number of titlelists.
The number of titles in a titlelist is unlimited.

A title is called by its name.
This name also assigns the notes and any existing mp3 files or video files to the title.

These files must be named exactly as the title.
IIf the title is Yesterday, the corresponding sheet PDF is Yesterday.pdf.
The mp3 file Yesterday.mp3 and the video file Yesterday.mp4.

If ***ATMObyte Böhm classic-Edition's*** internal scanning program is used to scan the scores,
this will automatically generate the name of the PDF file correctly
and the sheet music is stored in the directory. \ PDF \ Display1.

The selection of a title can be done in different ways.



1

Mauscrollwheel

The scroll wheel of the mouse scrolls through the title list.

2

arrow keys

Use the arrow keys to the left of the title list to maneuver.

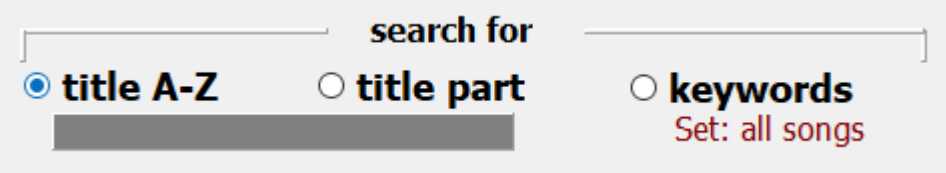
3

OnScreenKeyboardr

The title is selected using the screen keyboard below the title list.
The on-screen keyboard can be displayed and hidden as desired.
This is done by means of the keyboard on / off button in the menu bar.

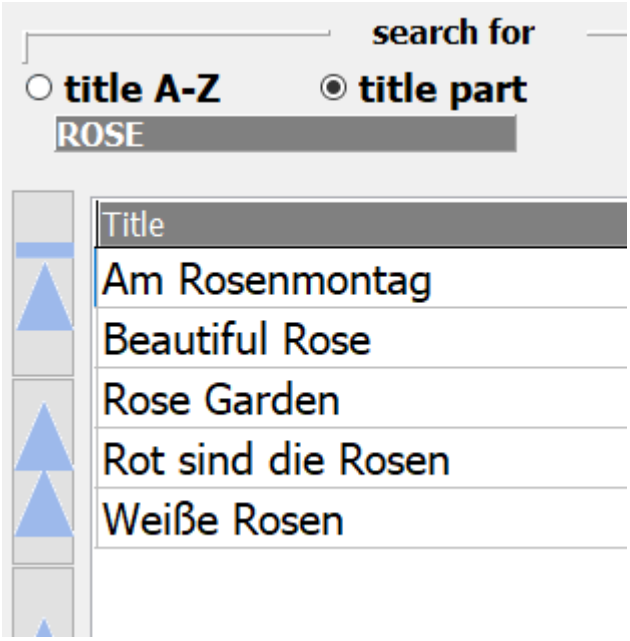
All functions can be performed by mouse or with a touchmonitor by finger.

Searching for a title using the on-screen keyboard or the
PC keyboard can be done after the title, is alphabetically
or it can also be searched for a letter sequence in the title name.
To do so, select Search for below Title bar or Title content below the menu bar.



If the title search is set to the beginning of the title, the first
title that starts with **B** is selected by entering the letter **B**.
If one enters now the letter **A** one ends up with the first title with the initial letters **BA**, e.g. Baker Street.
If you enter an **R** and there is no title with the initial letters **BAR** in the title list,
the first title is immediately marked with the initial letter **R**.

During the title search for content, the entered letter
sequence does not have to be at the beginning of the title,
but may be somewhere in the title name.
All titles are then displayed in which the entered letter sequence exists.
If you enter e.g. If you enter the word ROSE, all titles appear with this letter sequence.



When searching for keywords, the middle touch panel displays all the keywords used in the program.

Title	Bank	Register	Set1	Set2
!Volker	0	0		
's Boarische Bier	87	6		
16" und 8" Chor, minim. verstimmt	81	11

Navigate in the title list using the arrow keys

The blue arrow keys to the left of the titlelist can be used to navigate as follows:

to the first title

In the alphabet one
Letter back
e.g. from E to D

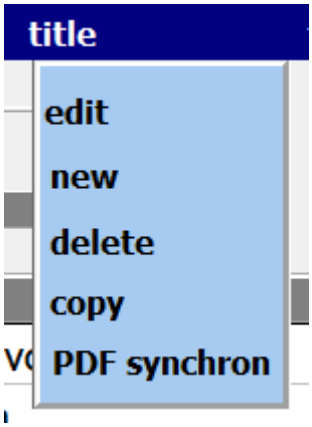
Click = one title back
Double click = scroll backwards

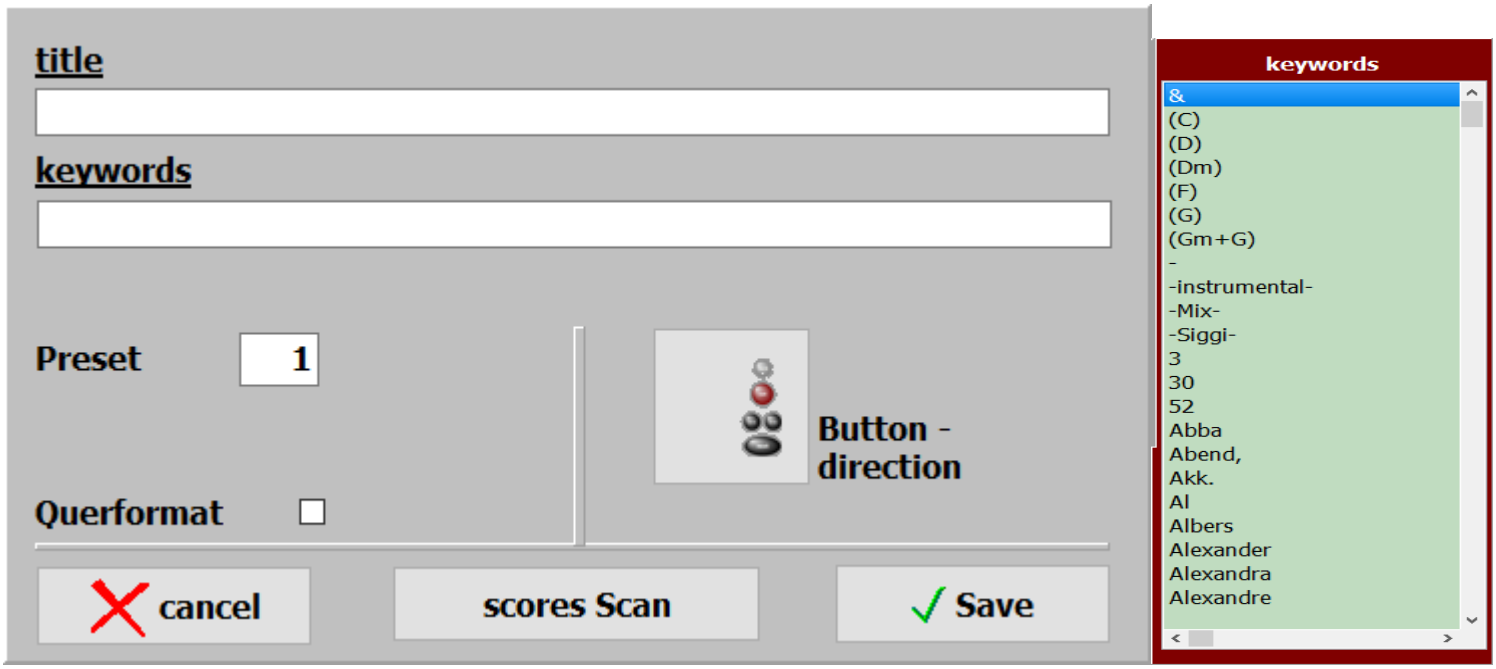
Click = one title forward
Double click = scroll forward

In the alphabet one
Letter forward
e.g. from D to E

to the last title

With title-> new in the menu bar a title is added to the current title list,
or by clicking on the *Insert key*.
The input mask then opens.





The most important input is the title name. Without this input can not be saved.

For each title keywords can be assigned.
After this, the title can then be searched.

The keywords already used in the program are listed in the list of tags
and can be accepted with a *double-click*.

If a new keyword is entered, it is automatically added to the keyword list.
Keywords can be the artist, the composer, the genre, the key, the epoch, and so on.

The entries for registration have 2 values.
1. the registration bank

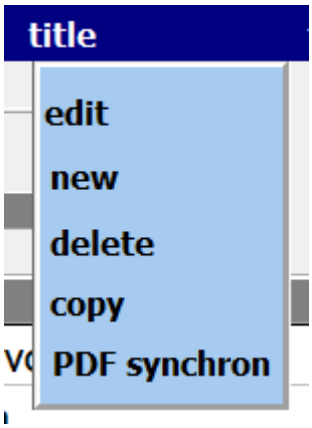
2. the registration memory to be started with.

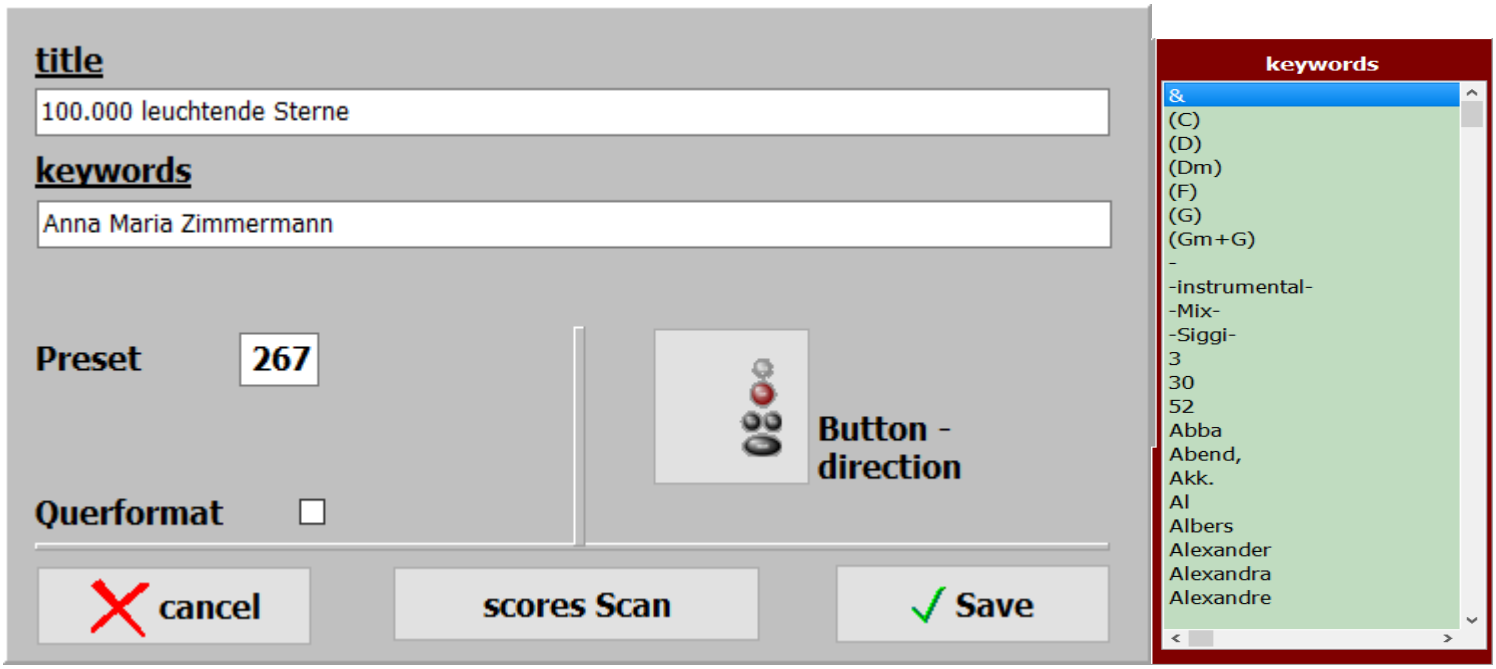
The Scan Scores button allows scores to be scanned directly from the program and the title.

This feature is detailed in Scanning Scores.

Title> Edit in the menu bar opens the selected title for editing.
It then opens the same mask as when creating a new title.
There are only the title name and all entered parameters of the title available.

The editing of a title can also be done by a click with the right mouse button on the title name.





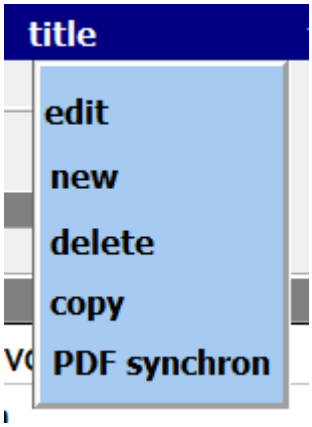
The most important input is the title name.
Without this input can not be saved.
For each title keywords can be assigned.
After this, the title can then be searched.
The keywords already used in the program are listed in the list of tags
and can be accepted with a *double-click*.
If a new keyword is entered, it is automatically added to the keyword list.

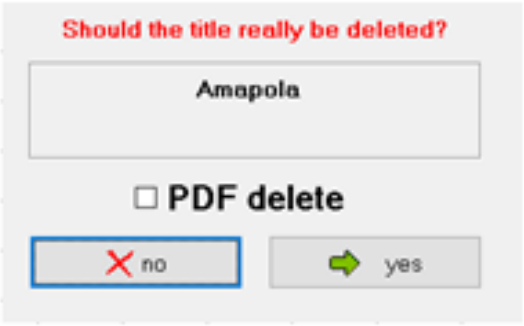
Keywords can be the artist, the composer, the genre, the key, the epoch, and so on.

The entries for registration are described in Registration.

The Scan Scores button allows scores to be scanned directly from the program and the title.
This feature is detailed in Scanning Scores.

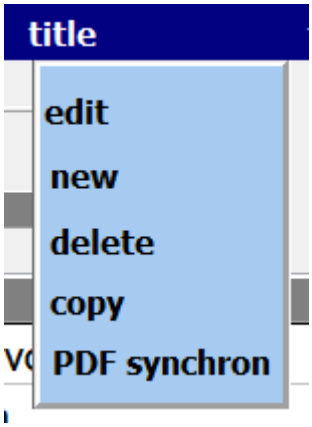
With Title-> delete in the menu bar a title can be deleted.
Deleting can also be done by clicking on the *Del key.*
When deleting, only the entry in the title list with all settings is removed.





If the *Delete PDF* option is activated when deleting a title,
the PDFs belonging to the title in **PDF\Display1**
and **PDF\Display2** are not completely deleted,
but rather moved to the **Archiv\Display1** or **Archiv\Display2** directories.
From there these can be copied back into the **PDF**
\Display1 or **PDF\Display2** directories at any time.
However, they are no longer visible for the **PDFsynchron** function.

The **Title-> Copy** function in the menu bar allows you to copy a title.



The title then appears with the same name and the extension **COPY**.

A women in Love	1	*	*			
Alexis	139	*				
Alhambra	262	*

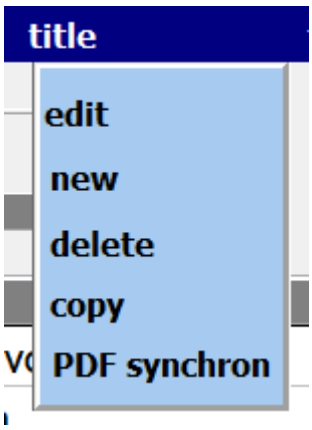
PDF synchron



This feature finds the PDF files in the **PDF\Display1** directory,
that are not present in the current playlist.
If you want to create a title from a displayed PDF, just click on
the PDF and in the current title list a title with the name of the PDF is created.

Via **print list** a list with all PDF files in the directory **PDF\D isplay1** is printed out.
The PDF's for which a title exists in the current playlist are marked with an **X**.

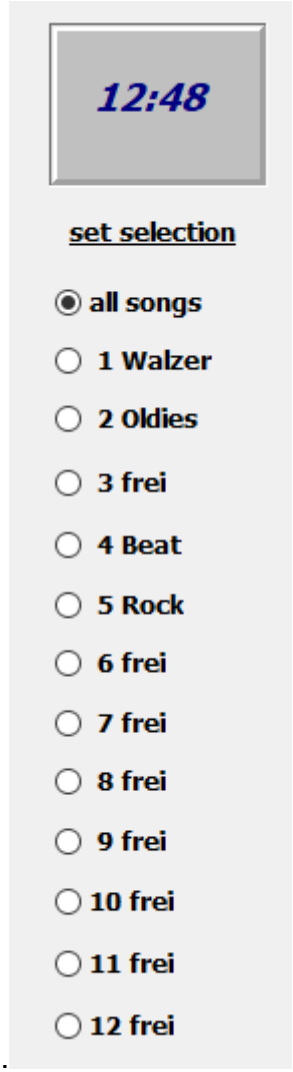
SETs are the selections for the playlist, which are located on the right edge of the screen.
The title list can be limited by the **SETs** to certain selection ranges



To assign a title to a **SET**, a star is generated for this title in the matrix for the relevant **SET** with a click.
A further click on this field deletes the marking

Titel	Register	Set1	Set2	Set3	Set4	Set5	Set6	Set7	Set8	Set9	Set10	Set11	Set12
!aaaa	1												
!Test 3 Seiten	1	*											
54 74 90 Stiller	478	*		*

Alles im Griff	457	*							*				
Aloha Hea	472	*											

If you now click on a **SET** on the right side of the screen, only the titles appear in the title list, which have been assigned to the **SET**.

The SET selection can also be made by clicking on the corresponding column header.

Set1	Set2	Set3	Set4	Set5	Set6	Set7	Set8	Set9	Set10	Set11	Set12
*											
*		*									
*		*			*						
*	*				*						

The names for the **SETs** can be changed by clicking with the right mouse button on the **SET** name.
If no name is entered for a **SET**, the name is automatically entered as the name.

Tilellist

A title list can contain an unlimited number of titles.

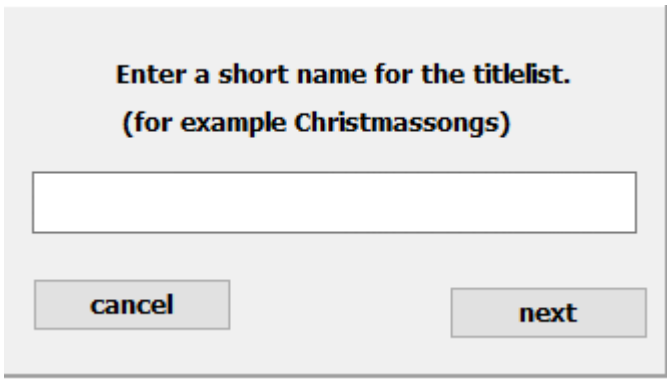
Any number of titlelists can be created.

At the first program start, the playlists are **Titelliste00-DEMO**
set with 20 titles as DEMO playlists.

If title ists are created, they start with the number 21.

Creating a new titlelist is done in the menu bar *with titlelist-new*.

An input window opens and the name of the new list can be assigned.



The self-created titlelists start with the number 20
and are numbered consecutively,
e.g. Titlelliste20 Christmas.

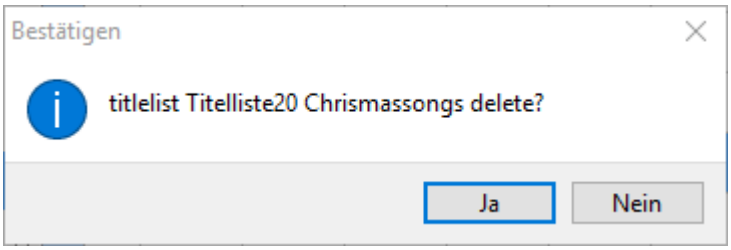
If the new title list is successfully created, this is confirmed.

Via *titlelist-> Rename* in the menu bar, the name of the titlelist can also be changed later.

change
new
delete
rename
Kurzbezeichnung von: Titelliste05
Tyros5
Neue Kurzbezeichnung:
Tyros5
abbrechen
übernehmen

Deleting a title list is done with *titlelist-> delete* in the menu bar.

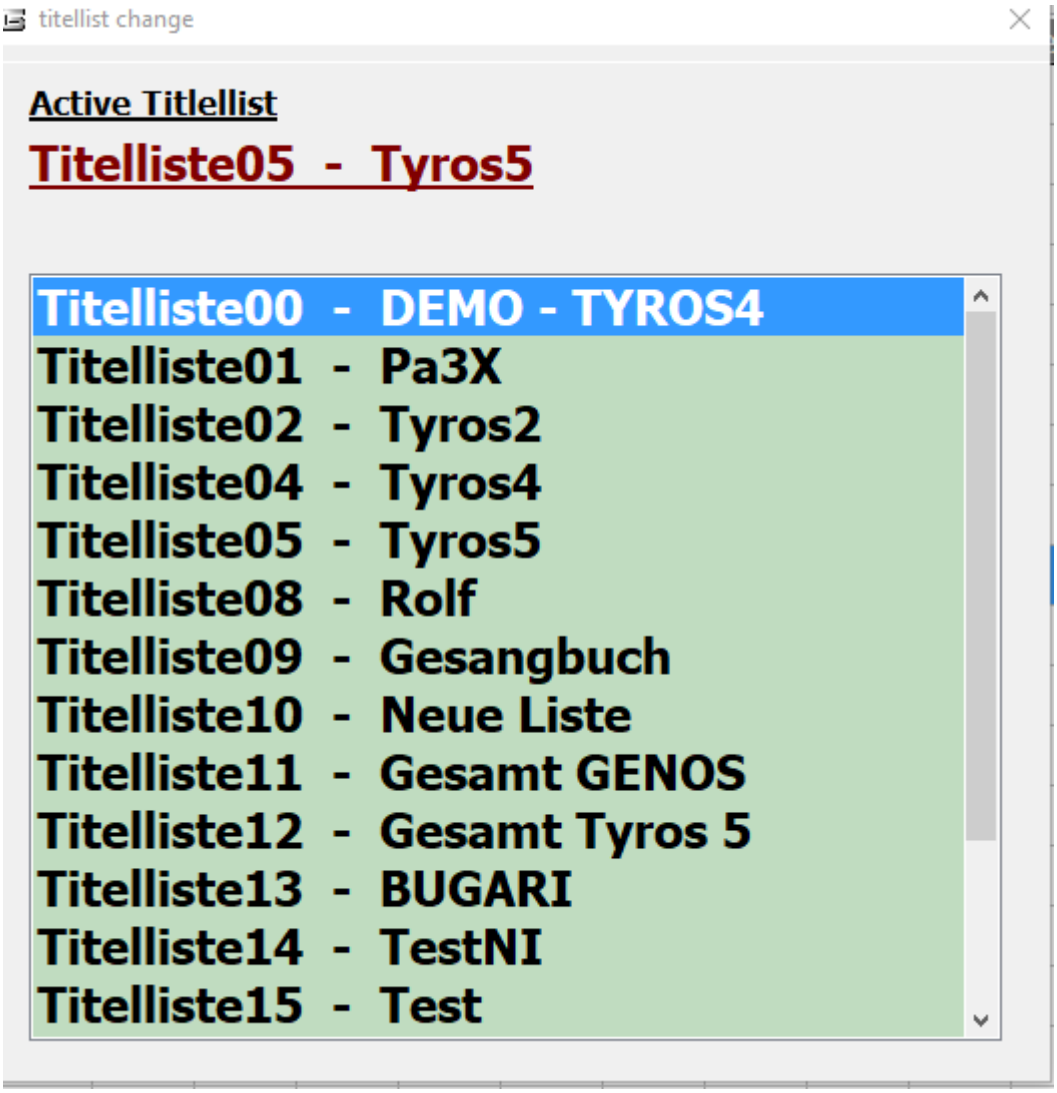
By clicking on the corresponding titlelist and confirming
the deletion query, the selected titlelist is deleted.



The active titl list and the DEMO Titellliste00 can not be deleted !!!

The change between the existing title lists is done by means of *title list-> change* in the menu bar.

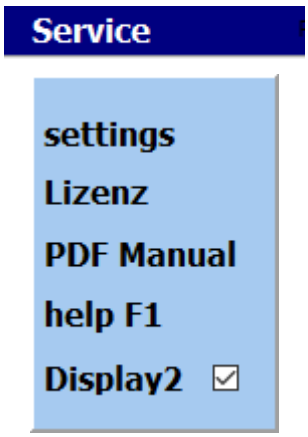
In the opening selection window all available titlelists are listed.
Click on the desired titlelist to activate it immediately.



Each title includes a score PDF.
This is located in the folder **PDF\Display1** or **PDF\Display2.**

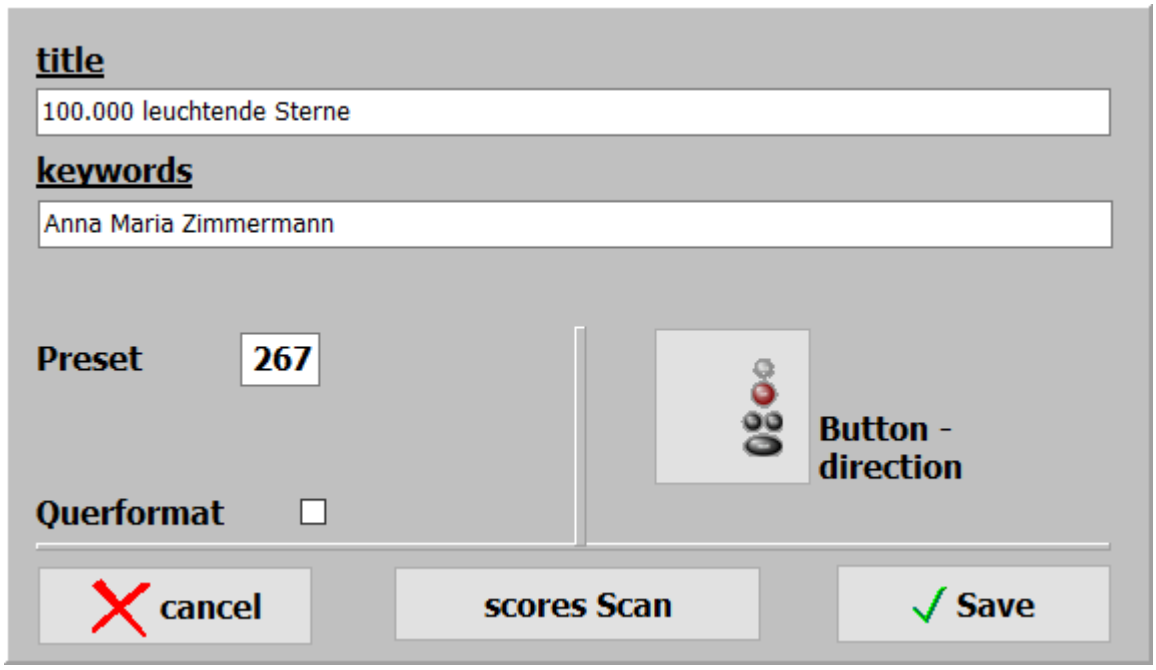
If notes are already available in PDF format, they can be used.
They just need to be copied to the directory **PDF\Display1** or **PDF\Display2**.

By default, the notes from the **PDF\Display1** directory are used.
However, if activated under *SERVICE* **Display**2, the notes from the **PDF\Display2** directory are used.
In this way the titles can be assigned different note images.

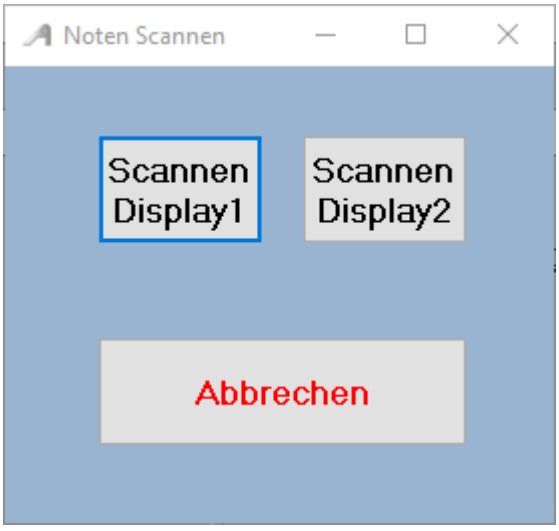


The PDF file must match the title name exactly,
So for the *title Red Roses*, the PDF file *Red Roses.pdf* must be called.
If printed notes are available for the title, they can be scanned in via the integrated scan function.
To do this, a scanner must be connected to the PC via USB.

If printed notes are available for the title, they can be scanned in via the integrated scan function.
To do this, a scanner must be connected to the PC via USB.

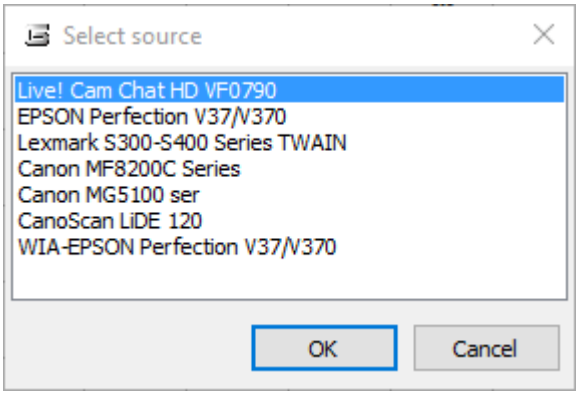


The next window determines whether the scanned notes
stored in **PDF/Display1** or in **PDF/Display2** ..



Click on **Scan Display1** or on **Scan Display2** to start scanning.

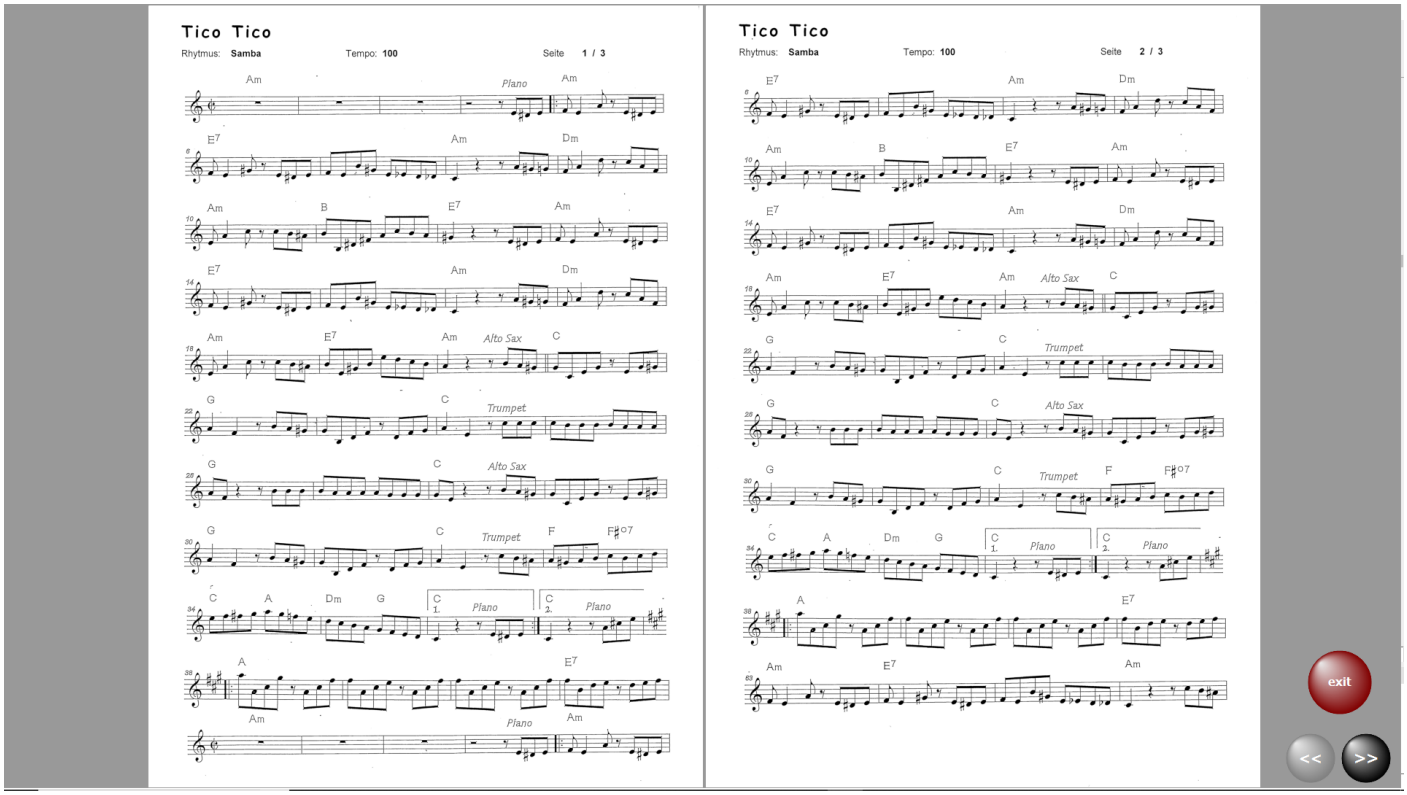
The optimal setting of the scanner must be made in the scan dialog and depends on the scanner.
If the scanner shows 2 scanner drivers, please use the driver that starts with WIA.



After the scanning process, the notes are automatically stored in the correct folder and can be immediately called up and displayed with the title.

There are no further entries like name of the PDF file or number of pages of notes necessary for the title, since this is done automatically by the program.

By clicking on the title name or pressing the *ENTER key*
the sheet music for the title is displayed.



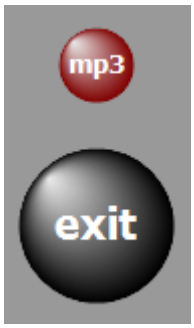
By clicking on the title name or pressing the ENTER key
In this case, it is a title with several Notidenitenamae.

With 
you go back to the title selection.

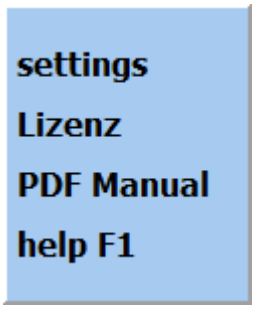
If the PDF file has multiple pages and scrolling is necessary,
the required buttons for turning pages are visible.

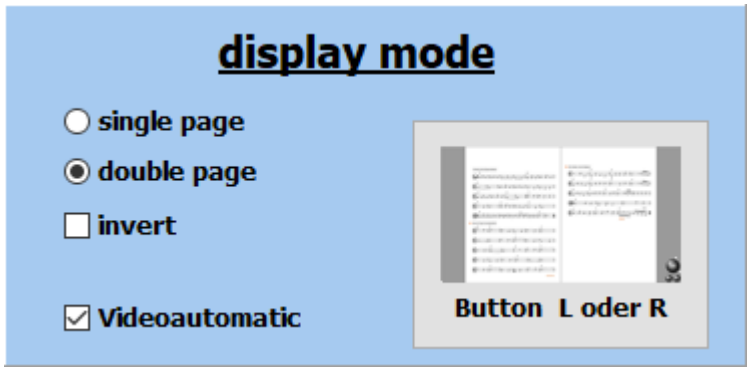
Turning pages can also be done with a footswitch or with a fingerwash (touch screen).

If an mp3 file is available, it can be started via the *mp3 button*.
This button is only visible if an mp3 file belonging to the title exists.



Whether the control button should appear to the left or right of the notes,
can be set under **SERVICE-> Settings** by clicking on the corresponding switch.





s a rule, two-page sheet music always displays 2 pages in parallel.
In principle, a 1-sided display is desired, e.g. with small monitors,
this can also be set under SERVICE settings.

The note display can also be inverted.
The notes then appear in white on a black background.
This option should be applied to the display in case of strong light.

Video

For each title a video can be deposited.
The videos are always in the directory ***VIDEO***.

If there is a video for a title, it will do so in the menu bar
with ***video*** displayed.

Click on this button to test the video playback.

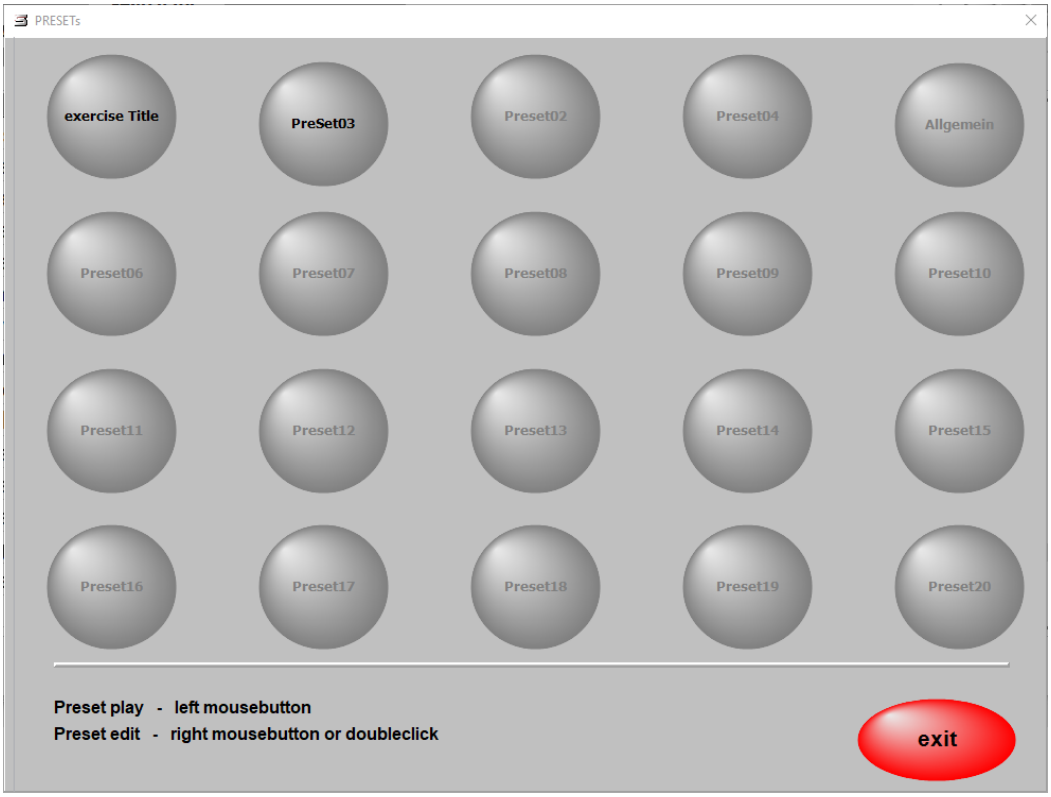
The supported formats is: mp4.

If you want to start the video with the title call, then **Service-> Settings**
to put a hook on **video-automati**c.

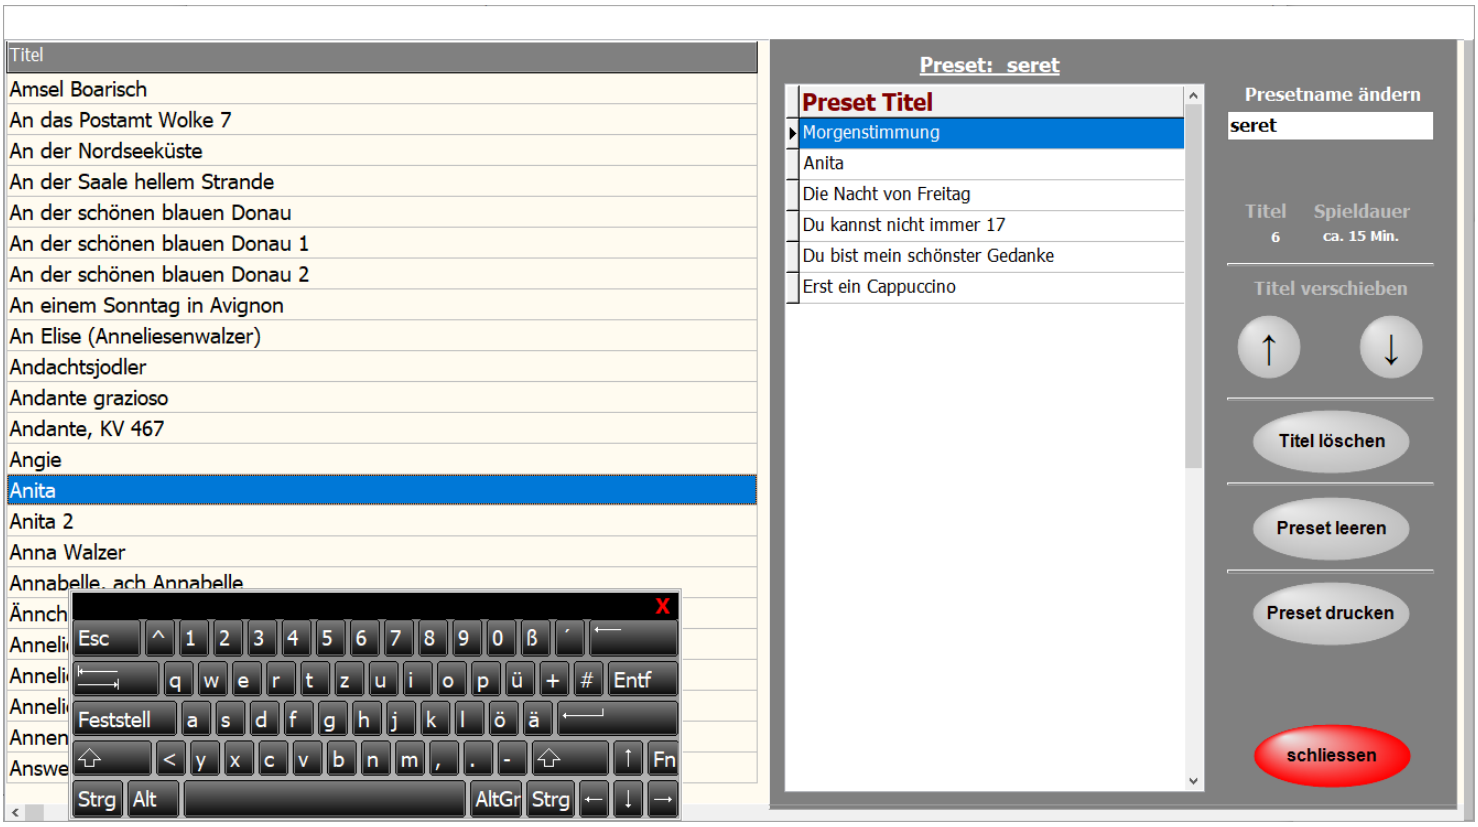
Is a 2nd screen or projector connected to the computer,
so the video is played on this.

If a video cannot be played, it is due to the missing codec for this format.
The missing codecs can be installed under **Service-> Settings -> Video Codec.**

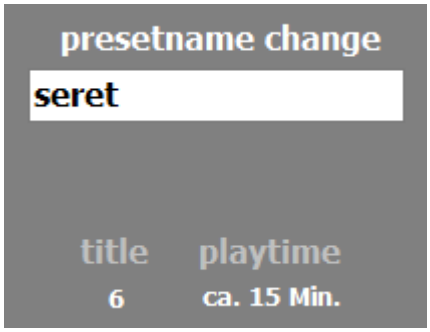
You can access the PRESETs via ***PRESETs*** in the menu bar.
Up to 20 presets can be created.
If a PRESET is provided with titles, the label of the corresponding button is black.
For empty PRESETs the label is gray.



In a PRESET any number of titel can be stored in any order.
The order can be changed at any time, as well as the content of a PRESET.
To edit a PRESET, right-click on the corresponding preset
or select the desired preset with a double-click for editing.
Now the PRESET is opened for editing and on the left side all titles of the active titlelist are displayed.



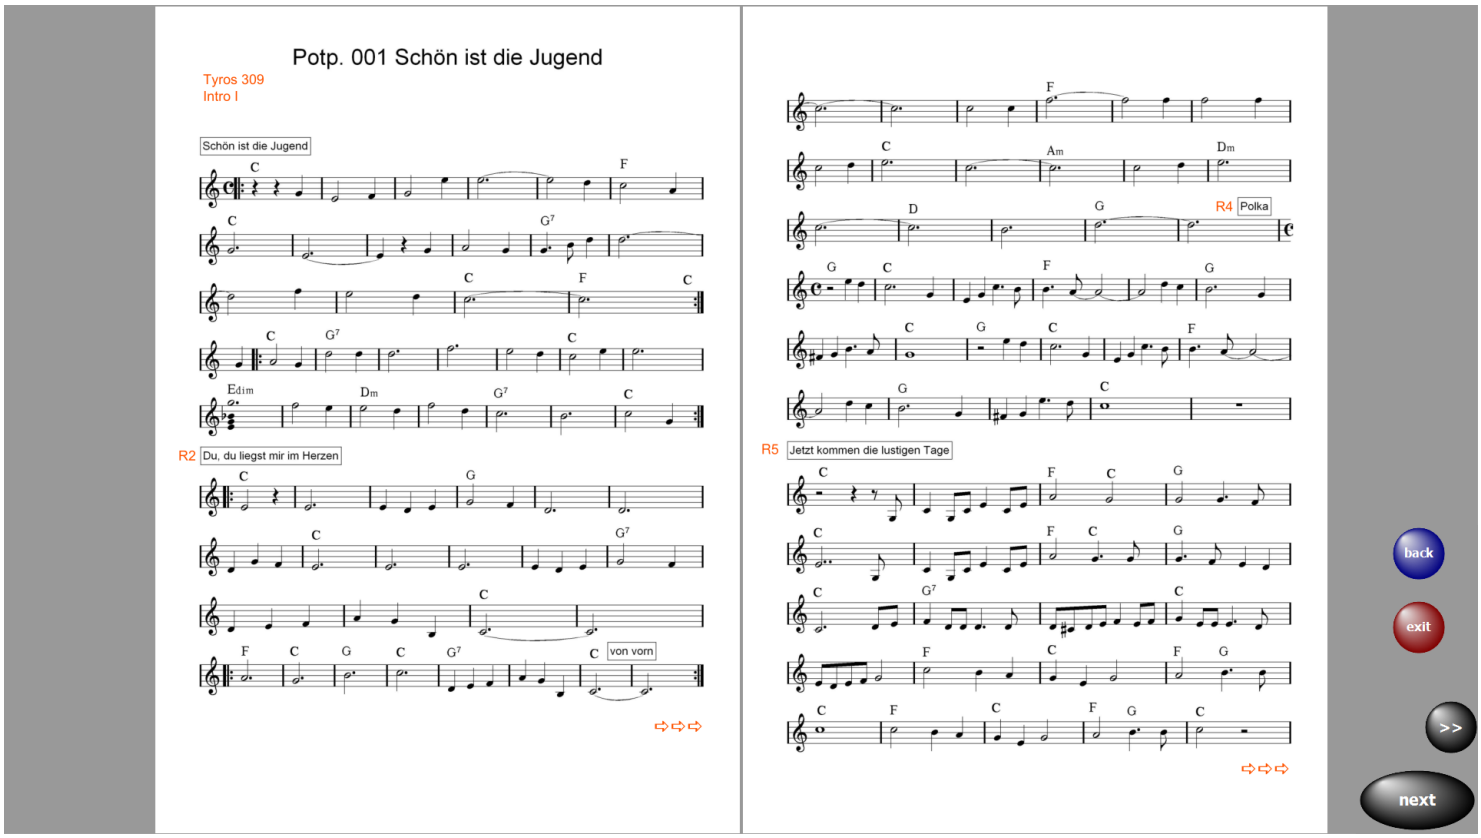
Double-clicking on a title in the titlelist will copy it to the PRESET.
It is inserted under the blue marked title in the PRESET.
Its position can be changed arbitrarily with the arrow keys.
The PRESET can be given a name.



The number of tracks contained in the PRESET and the
approximate playing time of the entire PRESET are also displayed.

Close will save the PRESET.

To start a PRESET, just click on the corresponding button.
Now the first title of the PRESET is called up and the notes are displayed.



A click on immediately calls up the next title.
So you can put together complete programs in the PRESETs and retrieve as needed.

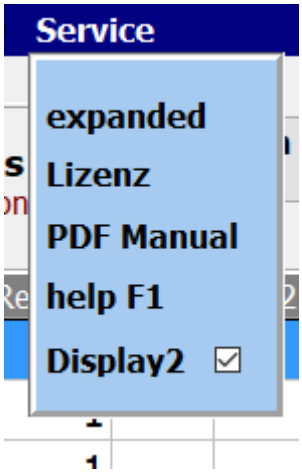
Via , the PRESET can be ended at any time.
With back the previous title is called.

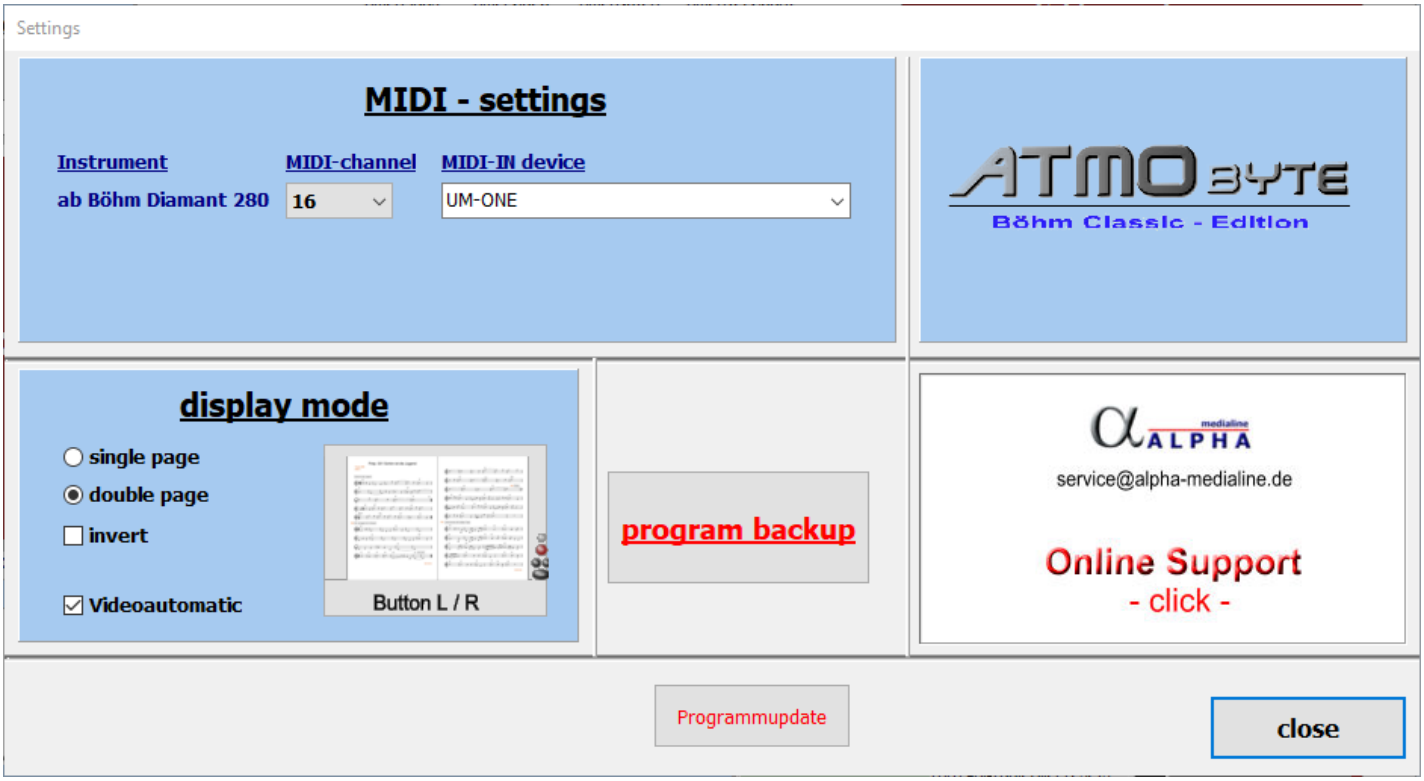
If you do not want to start a PRESET with the first title,
select the edit mode of the corresponding PRESET
and double-click on the desired start title.
The PRESET will now be played from the start title.

PRESET copy

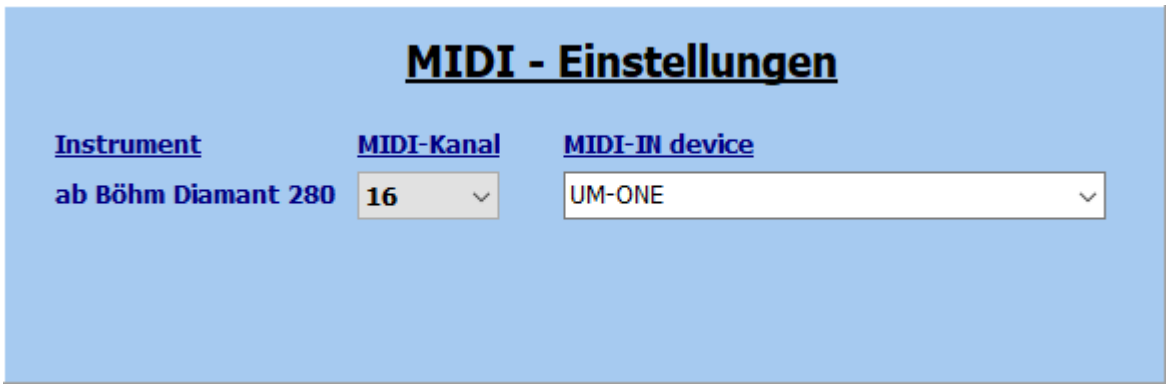
To copy a **preset**, drag the preset to the new **preset** while holding down the left mouse button. Then the complete content and the name of the **preset** will be copied.

All basic settings are made in the **SERVICE-> expanded**.
This affects the MIDI settings and the display settings.
Likewise, a complete backup can be made
and there is the possibility of a remote maintenance by TeamViewer.





The basic MIDI settings for keyboard control are in the
Program part **SERVICE expanded** made.



MIDI channel is the MIDI channel set in the organ.
In our example, this is channel 16.

The USB-MIDI driver used is the USB to MDI adapter used.
In this case, it's a Roland UM-ONE.

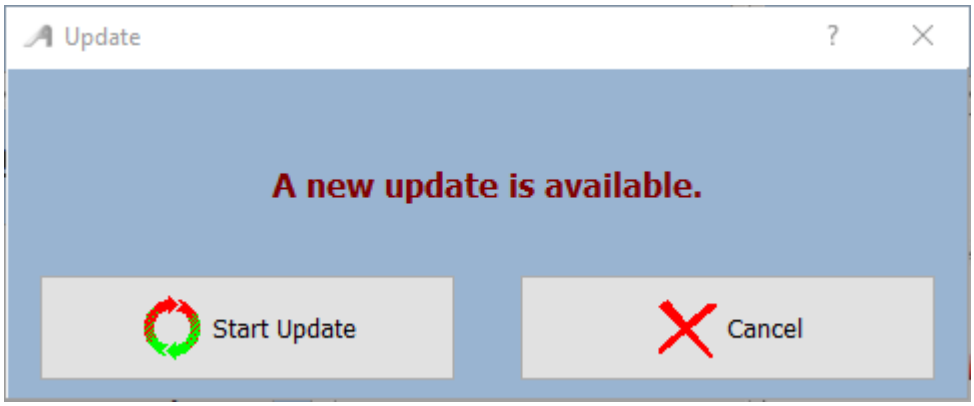
To use the registration call of the connected keyboard,
all you have to do is set the organ's MIDI setting as follows:

Menu 4-7.
There put the entry on the MIDI port, to the ATMObyte connected, e.g. UM-ONE.

Set the transfer channel to the channel in the software setting, e.g. Channel 16, confirm with Enter and it is good.

Once off and on again would be maybe very useful.

With a click on ***program update*** in the **expanded area** is checked automatically whether a new program version is available for download on the Internet.



The new version of the program can then be downloaded from the Internet by clicking **Start Update**. The prerequisite is, of course, that the PC is connected to the Internet.

equipment

footswich

footswich

Bluetooth

USB

bluetooth

PageFlip Dragon **PageFlip Firefly**

This foot switch - PageFlip Dragon - can be connected via Bluetooth as well as via USB.
It is freely programmable via Bluetooth. If the footswitch is to be used only for turning pages,
So the type - PageFlip Firefly - which can also be connected via Bluetooth is sufficient.
The footswitches are also preprogrammed for AKcontrol and offered with the software.

With the PageFlip Dragon it is e.g. possible:
Select title
Call up titles
to turn the page
play different Tusch's
etc.

If you have further questions, contact the manufacturer
of ***ATMObyte Böhm classic*** (info@alpha-medialine.de).

USB

Function in the program part Notes:
Left foot key: Title list scroll backward
Right foot key: Title list scroll forward
Middle foot key: Call up titles

Function for note display:
Left foot key: to scroll backwards to the previous track or notes
Right foot key: scroll forward through the next track or notes
Middle footswitch: start sound or next track

Thus, the software is also very suitable for musicians who do not use a keyboard
but want to access a large pool of notes in the computer, e.g. Accordion player or sax player etc.

If the footswitch is only needed to turn the notes, a 2-button footswitch is also available.
The foot switches are preprogrammed for ***ATMObyte Böhm classic*** and offered with the software.

Microsoft wireless Display Adapter

With the help of a Microsoft display adapter, a projector
or an additional monitor can be connected to the PC
If a video belonging to the title is called up manually or with activated video automatic, this is always displayed on the projector or on the additional monitor.
To do this, the Microsoft Diaplay adapter must be connected to the HDMI input of the projector or monitor. The USB plug of the adapter is used for the power supply and, if available, is connected to the USB socket on the projector or monitor. Otherwise, the power is supplied via a USB plug-in power supply.
If everything is connected and the projector or monitor
is switched on, the adapter is displayed on the screen.
The connection to the projector or monitor can now be
established via **SERVICE -> Wireless Display Adapter**.

AKcontrol can run on all Windows systems as of Win XP, even under Win 10.

On MAC systems AKcontrol also runs, but VMware Fusion must be installed beforehand.

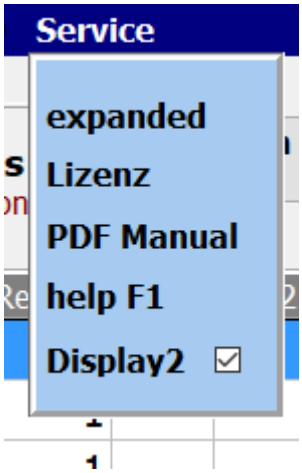
There is no special power required from the PC.
The standard computers offered today meet the requirements of the software.

ALL IN ONE PC's are best suited with a touch screen.
You only have one device.
These PCs are available in different sizes.

For a fixed installation on your home keyboard, this can be a bit bigger screen, about 23 ".

On the go, a tablet, netbook, transbook or notebook of about 13 "is enough.

To use the internal help documentation), there are 2 possibilities.
The first option is to press the *F1 key* on the keyboard.
The second possibility is the call via **Service-> Help** in the menu bar.

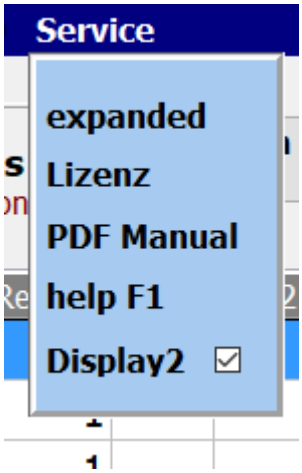


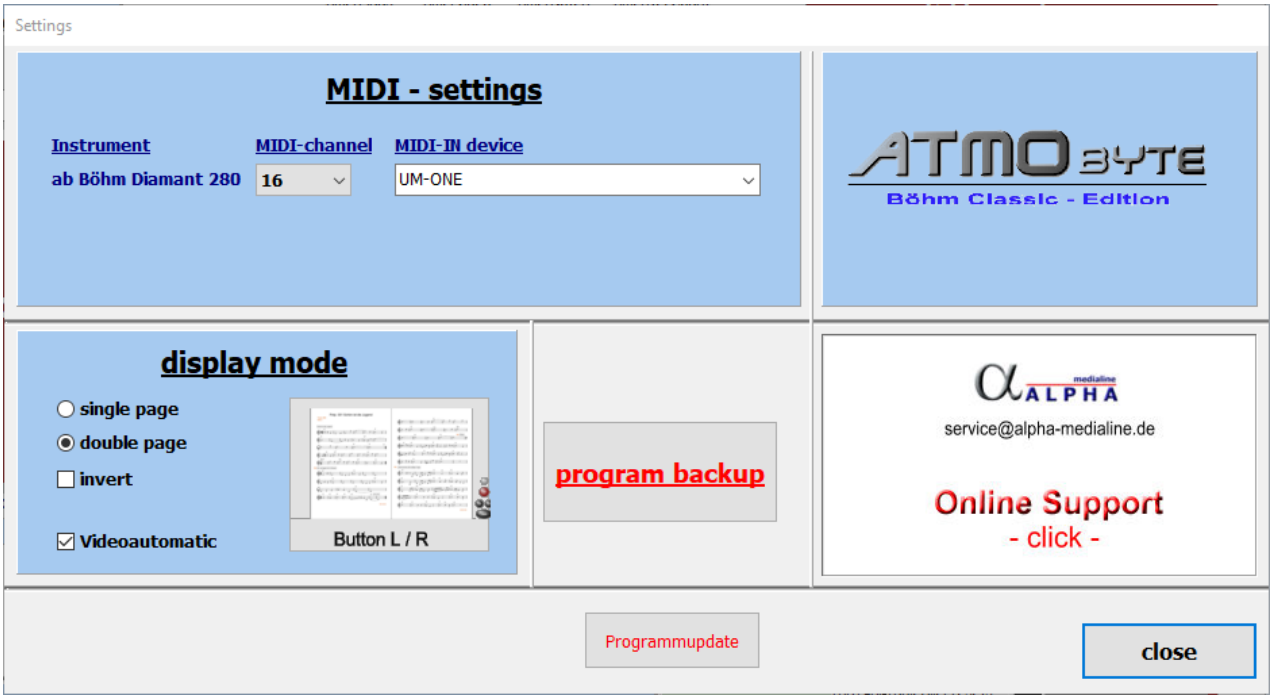
How can I simulate the right mouse button with a finger on a touch display?

Very easily.
Leave your finger on the desired position of the display (about 1 second),
until a mark becomes visible around the finger (Win7 a square, Win8 and Win10 a circle).
This basically applies under Windows and not only for ***ATMObyte Böhm classic-Edition***.

remote maintenance

In the area **SERVICE-> expanded** can with a
Click on remote maintenance to connect to the internet.
It then starts the remote maintenance program TEAMVIEWER.
This allows direct help via the Internet.





Enter comments in sheet music

The existing PDF notes in ATMObyte can easily be supplemented with additional comments, etc.

Select the title, but do not call the notes yet and press **F10** on the PC keyboard.

Now the PDF file with the notes is opened with the PDF program,
which is set as the default program under Windows.

In general, this is e.g. the free **Acrobat Reader**.
More recommendable is the free program **FOXIT READER**.
Of course, any other PDF program can be used with the edit function.
